Team 237's "\$237" Sponsor for the 2012 Season

Engineering and technology education have never been as important as it is now. As a society we face daily assaults on our economy and our environment that can only be solved through a better educated work force. We offer high school students in Watertown a program that encourages engineering and technology education. The FIRST Robotics program at Watertown High School provides a hands-on introduction to engineering and problem solving that influence their career choices.

I want to be a sponsor of WHS FIRST Robotics Team for their 2012 season. Being a "\$237" sponsor you get featured on our website and your name will be displayed on the 2012 robot.

Please make out a check to Watertown FIRST Robot, Inc. and a check for \$237.00 and return it with this application to us. That's all you have to.

Thank you for being part of Team 237.

Name to appear on robot _____

Contact Name _____
